2026 Graduating

Open to Internships

## ABOUT ME

## Building the future, one commit at a time.

Computer Science undergraduate at **Geethanjali College of Engineering and Technology**, Hyderabad, with a deep passion for artificial intelligence, machine learning, and secure systems. My journey began with curiosity about how machines learn, which evolved into hands-on experience building AI-powered applications, exploring network security, and developing full-stack systems. Actively seeking internship and entry-level opportunities at product companies where I can contribute meaningfully to real-world engineering challenges.

## SKILLS

## Tools & Technologies

### Programming Languages

Python

Java

C

SQL

### AI / Machine Learning

Computer Vision

OpenCV

NumPy

Pandas

Scikit-learn

TensorFlow

REST APIs

## PROJECTS

## Things I've Built

# Vision Proctor: AI Facial Behavior Detection

An intelligent proctoring system using **computer vision** and **deep learning** to monitor exam candidates in real-time. Detects suspicious behaviors — eye movement, head orientation, facial expressions, and unauthorized objects — ensuring academic integrity without manual monitoring overhead. Built to address the growing demand for remote examination integrity with automated, scalable behavioral analysis.

## Key Features

- Real-time gaze & eye tracking
- Head pose estimation & orientation
- Suspicious object detection (phone, book)
- Automated alert generation system
- Tamper-proof session logs & reports

## Technologies Used

Python

OpenCV

Deep Learning

MediaPipe

Flask

Computer Vision

NumPy

## Impact

Eliminates need for manual proctors; deployable at scale for online education platforms and remote examinations.

02

# Network Vulnerability Scanner

Python-based tool that scans local and remote networks for open ports, service fingerprinting, and known CVEs. Outputs structured security reports with remediation suggestions.

Python

Networking

Cybersecurity

03

# Student Performance Predictor

ML model predicting student academic outcomes based on attendance, assignment scores, and engagement patterns — enabling early intervention for at-risk students.

Python

Scikit-learn

Pandas

Data Viz

## EDUCATION

# Academic Background

August 2023 — January 2026

## Bachelor of Technology — Computer Science Engineering

Geethanjali College of Engineering and Technology · Hyderabad, Telangana

- Specialization in Artificial Intelligence and Machine Learning applications
- Relevant coursework: Data Structures, Algorithms, DBMS, Computer Networks, Machine Learning, Computer Vision
- Completed multiple industry certifications alongside academic curriculum
- Active participant in technical workshops, hackathons, and coding competitions

## CERTIFICATIONS

# Industry Credentials

### CONTACT

## Let's build something remarkable.

I'm actively looking for internship and entry-level opportunities in **AI/ML**, **software engineering**, and **cybersecurity**. Open to opportunities at Google, Microsoft, Amazon, Adobe, TCS Digital, Accenture, and more.
